

Call for Proposals

Deadline: 31 January 2018

The **Isaac Newton Institute** is a national facility based in Cambridge, UK, and attracts scientists from all over the world to research programmes in all areas of the mathematical sciences, broadly understood. At any one time there are two or three visitor programmes at the Institute, each with up to 20 participants. For more information see: www.newton.ac.uk

135 programmes have been completed to date and details are listed at:

www.newton.ac.uk/science/programmes.

Administrative support is provided and funding is available to each programme toward travel and subsistence support for participants and organisers.

The Institute now invites proposals for 1-, 4- and 6-month research programmes in any branch of the mathematical sciences. Please note a special case should be made for shorter proposals and there is no guarantee these will be held in the summer. The deadline for submission is **31 January 2018**, for consideration at the meeting of the Scientific Steering Committee in **May 2018**.

Further information can be found online at newton.ac.uk/science/proposals.

*Anyone interested in making a proposal is encouraged to **contact the Director** (see below), by telephone or email, for **advice and informal feedback**. The Director will be pleased to help nurture, without prejudicing the final outcome, proposals in the fundamental mathematical sciences as traditionally understood and in cross-disciplinary projects, for example in the mathematics related to biology, ecology, the environment, the economy, the physical sciences, medicine, indeed any area where innovative mathematics plays a significant role.*

We request that submissions should be made online via:
proposals.newton.ac.uk
